CHRISTIAN MARTÍNEZ BALLESTA

Junior Full Stack Developer

Villena, Alicante | (+34) 685 256 164 | chrmarbal@gmail.com | linkedin.com/in/christian-martinez-ballesta
Personal Portfolio: chrmarbal-porfolio.vercel.app

PROFESSIONAL SUMMARY

Junior Full Stack Developer with two Higher Vocational Training Degrees in Web and Cross-Platform Application Development (DAW and DAM), and an Intermediate Vocational Training Degree in Microcomputer Systems and Networks (SMR). Hands-on experience in web development with React, Node.js and relational databases, and in process automation with Python. I stand out for my problem-solving skills, ability to adapt quickly to new technologies, teamwork and a proactive attitude toward learning modern architectures. Focused on joining a technical team where I can provide scalable solutions and continue my professional growth.

TECHNICAL SKILLS

Programming languages: JavaScript, Python, Java, C#, Kotlin
Frontend: React, HTML5, CSS3
Backend: Node.js, Express, APIs REST, JWT, OAuth
Databases: MongoDB, SQL Server, MySQL, PostgreSQL
Automation and tools: Python, Selenium, Playwright, RPA, Git, GitHub
Architecture and methodologies: MVC, MVVM, SCRUM

PROFESSIONAL EXPERIENCE

RPA Automation Developer

CONVOTIS Iberia · Remote · 03/2026 – 06/2026 · Internship

- Development of RPA automations through technical challenges, using Python with Selenium and Playwright.
- Development of an internal automation project to renew candidates' data retention permissions for the Human Talent (Human Resources) department.

Web Application Developer

Tvitec · Villena, Alicante · 03/2025 – 06/2025 · Internship

- Development of a web application to manage customers' bulk orders, with automatic import from Excel.
- Implementation of automatic price calculation, applying each customer's own rates and discounts.
- Automatic generation and sending of an XML file to the customer's coordinator for integration into the ERP.

Microcomputer Systems and Networks Technician

Tvitec · Villena, Alicante · 03/2023 – 06/2023 · Internship

- Installation, configuration and maintenance of computer equipment and networks.
- Diagnosis and resolution of hardware and software issues, with technical support for users.

FEATURED PROJECTS

GYM TONIC — Mobile app for personalized workout routines

Final Degree Project (DAM) · Grade: 9/10 · Kotlin · MVVM · Node.js · MVC · Microsoft SQL Server

- Development of a mobile app to create personalized workout routines, available in Spanish and English.
- Implementation of groups to train with friends, where members can create routines for the whole group.
- Scoring system that rewards or penalizes users based on their performance and consistency.
- Implementation of login with Google and Facebook.
- Frontend (mobile app) developed in Kotlin with MVVM architecture; backend developed in Node.js with MVC architecture; data stored in Microsoft SQL Server.

MCNANOSOFT — Personal portfolio and web platform

Final Degree Project (DAW) · Grade: 10/10 · React · Node.js/Express · MongoDB · REST APIs · Git/GitHub

- Development of a full stack web application with React, Node.js/Express and MongoDB, including a project catalog, search filters and a payment gateway with Stripe.
- Implementation of authentication with Google and GitHub, password recovery and a role system for guests, registered users and administrators.
- Development of a shopping cart, a personal library, ratings and an admin panel to manage users and content.
